

## BASICS

1. WAP to display your name on the screen.
2. WAP to display your friends name on the screen.(\n, \t)
3. WAP to print an Integer (Entered by the User)
4. WAP to declare variable of each data type and print their values.(int,char,float)
5. WAP to calculate the increment of a given number by 1
6. WAP to calculate the increment of a given number by 7
7. WAP to calculate the addition of 2 numbers.
8. WAP to calculate the multiplication of three numbers.
9. WAP to Compute Quotient and Remainder
- 10.WAP to Multiply two Floating Point Numbers
- 11.WAP to calculate the area of Square.
- 12.WAP to calculate the perimeter and area of Rectangle
- 13.WAP to calculate the area of Circle
- 14.WAP to calculate the Simple Interest
- 15.WAP to find the average of 5 numbers.
- 16.WAP to find the size of data types in C (Hint: use sizeof() operator)
- 17.WAP to display the following o/p :
